Can solar energy be used effectively in Haiti?

Solar energy can be used effectively in Haiti, offering energy self-sufficiency to the most isolated cities in the absence of a power grid. The country's location in the tropics gives it very strong solar energy potential. It is believed that solar energy will play a fundamental role in access to electricity over the next 10 to 15 years.

Why is distributed solar PV the only energy source in Haiti?

Since only about 13% of the people even have grid access, distributed solar pv is the only energy source that can supply all the people electricity for now. Haiti has limited energy resources: no petroleum or gas resources, small hydroelectricity potential and rapidly declining supplies of wood fuels.

Is Haiti a solar power market?

Recently, many solar companies have seen Haiti as a huge market potential for solar energy. The founder of 10Power estimates that the potential solar power market is worth over \$500 million. In 2013, the completion of Hôpital Universitaire de Mirebalais came to an end. This hospital is the largest solar-powered hospital in the world.

Why did Zola electric join Haiti green solutions?

Energy technology company ZOLA Electric announced the partnership with local renewable energy pioneer Haiti Green Solutions for the deployment of its flagship energy technology platform to help address the energy crisis in the country, where the vast majority of its 12-million population lack access to reliable and affordable energy.

Why is energy so expensive in Haiti?

The economy in Haiti has a heavy reliance on fossil fuel energy which is entirely imported. But rising energy prices caused by the recent global social and economic turmoil have hit the domestic energy market hard. Today, Haiti sees some of the highest diesel costs in the world, peaking at \$15 per gallon.

Why is Zola launching in Haiti?

The launch in Haiti is also ZOLA's first time tapping into the North American market. The economy in Haiti has a heavy reliance on fossil fuel energy which is entirely imported. But rising energy prices caused by the recent global social and economic turmoil have hit the domestic energy market hard.
