

What is energy in Croatia?

Energy in Croatia describes energy and electricity production, consumption and import in Croatia. As of 2023, Croatia imported about 54.54% of the total energy consumed annually: 78.34% of its oil demand, 74.48% of its gas and 100% of its coal needs.

Who is the distributor of electricity in Croatia?

Under the 2004 Energy law, customers in Croatia are allowed to choose their preferred distributor of electricity. However, HEP Operator distribucijskog sustava or HEP-ODS (a Hrvatska elektroprivreda subsidiary) remains the largest distributor to both industry and households.

Could Croatia have been a regional oil and gas import hub?

Croatia could have already assumed a much bigger role as a regional oil and gas import hub had it not delayed and scaled back the construction of its LNG terminal for a decade, said Andr s Simonyi, an energy expert at the Atlantic Council's Global Energy Center. "The Croats are very late," Simonyi said.

How much electricity does Croatia produce in 2022?

The total production of electricity in the Republic of Croatia in 2022 was 14,220.5 GWh, whereby 63.7 percent (9,064.9 GWh) was produced from renewable energy sources, including large hydropower plants.

How does Croatia get its electricity?

Croatia satisfies its electricity needs largely from hydro and thermal power plants, and partly from the Kr ko nuclear power plant, which is co-owned by Croatian and Slovenian state-owned power companies. Renewable energies account for approximately 31.33% of Croatia's energy mix.

How much energy does Croatia import?

In 2020 the country imported 53.6 per cent of its total primary energy supply, close to an EU average of 57.5 per cent. Croatia produces oil and gas but unlike most of its Western Balkan neighbours, it no longer has its own coal reserves. Croatia is somewhat dependent on electricity imports, depending on hydrological conditions.

Croatia: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across ...

Vermilion's establishment of early entry positions in Croatia, Hungary and Slovakia represents an extension of our European growth strategy. We have approximately 0.9 million acres of undeveloped land across these three ...
