This study collected comprehensive information on local HEPA policies on the French Riviera in order to obtain an overview of the HEPA policies within this territory. Our results may contribute to a better understanding of the development of local HEPA policies as they highlight some of the barriers, facilitators, and perspectives.

The Health and Energy Platform of Action (HEPA) is a multi-stakeholder partnership made up of members states, intergovernmental organizations, nongovernment organizations, private sector entities, philanthropic foundations and academic institutions.

WHO in collaboration with World Bank, IRENA and SEforALL has produced a global assessment report on the status of electricity access of health-care facilities. The publication provides a comprehensive update on the status and ...

The overseas territories largely import energy that is still highly carbon-intensive (coal, fuel oil). Particularly affected by climate change, the French Overseas Territories must ...

In France, an emerging policy localism (TEPCV) is surfing on the ongoing activist political structuration of innovative territories and invoking positive energy territories (TEPOS). A rough census of significant experiences in this domain indicates only a few local experiences.

The overseas territories largely import energy that is still highly carbon-intensive (coal, fuel oil). Particularly affected by climate change, the French Overseas Territories must reconcile the inseparable and complementary objectives of energy “transition” and “autonomy”.

The global Health and Energy Platform of Action (HEPA) aims to ensure universal access to clean and sustainable energy to protect health. With an initial focus on clean cooking and health-care facility electrification, the Platform aims to catalyse the scale of results required to achieve SDG 3 on health and SDG 7 on energy by:

The report identifies three key pillars that form the foundations for the actions needed to realign the global energy transition with climate objectives: building the necessary infrastructure; advancing a policy and regulatory architecture that can facilitate targeted investments, and improve socio-economic and environmental outcomes; and the ...

Dr Tedros Adhanom Ghebreyesus, Director-General of WHO, announced his vision to build a "Health and Energy Platform of Action" (HEPA) to enhance multisectoral collaboration between the health and energy sectors and mobilize the political and financial commitments needed to achieve Sustainable Development Goals (SDGs) 3 and 7.

WHO in collaboration with World Bank, IRENA and SEforALL has produced a global assessment report on the status of electricity access of health-care facilities. The publication provides a comprehensive update on the status and key actions needed for providing reliable, modern energy to health-care facilities in low- and middle-income countries.

In France, an emerging policy localism (TEPCV) is surfing on the ongoing activist political structuration of innovative territories and invoking positive energy territories (TEPOS). ...

The Health and Energy Platform of Action's (HEPA) vision is to improve the poorest populations' health and livelihoods through the adoption of clean and sustainable energy. HEPA is a multi-stakeholder platform convened by the World Health Organization (WHO), along with the United Nations Development Programme (UNDP), the
