Why do people install home battery storage systems?

"Energy independence is one of the biggest reasons people install home battery storage systems," says Gerbrand Ceder, professor at UC Berkeley and faculty staff scientist at Lawrence Berkeley National Laboratory. "It's seamless, so you don't even notice when power switches from the grid to your battery backup system."

What is the best battery storage system?

Our top pick is Generac PWRcell. We independently evaluate all recommended products and services. If you click on links we provide, we may receive compensation. Learn more. Home battery storage systems have skyrocketed in popularity during the past few years for many different reasons.

Why should you choose a modular battery?

Each battery is packed with an innovative energy optimizer for independent charging and discharging, providing more attainable energy. The energy optimizer is what makes the modular design possible, allowing you to scale output and capacity based on your needs.

Does a solar roof have a battery backup?

The AC-coupled battery backup is included when you purchase solar tiles (which sit on the roof) or solar roof tiles (solar tiles that replace your existing roof). The solar roof is made of glass solar tiles, which produce energy, and steel roofing tiles, which provide longevity and corrosion resistance to your roof.
