Efficiently designed hybrid projects inject renewable energy into the grid, providing reliable power during times of peak demand, as the wind provides winter peak and the sun provides summer peak power. The Hybrid Renewables system provides sustainable and affordable electric power for rural communities.

Dubai-based renewables company AMEA Power LLC said today it has commenced construction work on the 20-MW expansion of an existing solar power plant in Togo, which will also get a battery storage system.

The 50MW Sheikh Mohammed Bin Zayed solar power project, Togo's first renewable energy facility and one of the largest solar energy projects in West Africa, is now operational. The project was financed by the International Renewable Energy Agency (IRENA) and the Abu Dhabi Fund for Development (ADFD) as part of efforts to help address energy ...
