GH60 hydraulic hammers utilize a single accumulator while GH6 hammers are equipped with two accumulators. Both have a TE ac-cumulator at the top of the hammer (Fig. 1) that is charged to 350 psi (413 kPa). GH6 hammers also have an SE accumulator located on the side of the hammer (Fig. 1). The SE accumulator is charged to 800 psi (5516 kPa).

The leather bowl inside the accumulator will damage the leather bowl when the nitrogen is small, and it is troublesome to dissect the whole during maintenance. The accumulator is a relatively precise device, and there should be no gaps during installation and maintenance, otherwise it will leak nitrogen, causing the breaker to be weak and the ...

The accumulator is filled with nitrogen, which uses the hydraulic breaker to store the remaining energy and the energy of the piston recoil during the previous strike, and releases the energy at the same time during the second strike to increase the striking ability, usually at When the hammer itself cannot reach the impact energy, install an accumulator to increase the impact ...

The 600 kg 999E Heavy Duty hydraulic hammer is suitable for carriers in the 3.9 to 13 tonne range. Robust housing of the Rammer 999E withstand wear and no-tie-rods enables fast and easy servicing. Twin handed design allows optimal mounting on both left and right-handed carriers, prolonging the service life of the hose connections.
