

Solar potential in Hungary. Solar power in Hungary has been rapidly advancing due to government support and declining system prices. By the end of 2023 Hungary had just over 5.8 GW of photovoltaics capacity, a massive increase from a decade prior. [1]

We have planned to open in the CEE region with our Hungarian headquarters, and we also see significant potential in the Balkan market. We hope to be able to complete the first phase of project development in Hungary in the near future, and there are already new projects in the preparatory phase.

Solar power in Hungary has been rapidly advancing due to government support and declining system prices. By the end of 2023 Hungary had just over 5.8 GW of photovoltaics capacity, a massive increase from a decade prior. Relatedly, solar power accounted for 18.4% of the country's electricity generation in 2023, up from less than 0.1% in 2010.
