When the power drops, the solar inverters are designed to cut out. This is to protect anyone that might be working on the power system external to your home. In cases where there is battery storage, and type of battery inverter is installed that can operate "stand-alone" then certain circuits of your home can operate.

Backup your power with Tesla Powerwall 2. Tesla has launched the ability to use Powerwall 2 for backup power through its new Gateway 2 hardware. The Backup Gateway 2 looks like a small Powerwall 2 and acts as a motoring and energy management system for the home battery pack.

Our DB-connected inverters, portable inverters, and generators can help you ensure that your home or business has a reliable backup power supply and that operations remain unaffected. We also provide grid-tied and hybrid solar ...

A solar battery is required for storing backup electricity in case you wish to go off-grid. However, it is also important to connect the inverter to the grid. For this process, the installers use a normal plug to connect to the main power switchboard.
