

What is Iran's potential for solar-based electricity generation?

Iran's potentials for solar-based electricity generation At present, Iran is producing only 0.46% of its energy from renewable energy sources. In 2016, the country's renewable-based electricity generation sector was mainly comprised of 53.88 MW wind, 13.56 MW biomass, 0.51 MW solar and 0.44 MW hydropower .

Who is phono solar company?

PHONO is a global leading solar products and services provider. It is affiliated to SUMEC Group, a subsidiary of Fortune 500 corporation, China National Machinery Industry Corporation Ltd (Sinomach).

Why are solar PV modules reducing performance in Iran?

The annual average air temperatures of all the provinces of Iran is higher than 25 °C. Therefore, the PV modules performance will dramatically reduce due to high ambient temperatures.

Is solar energy a viable source of energy in Iran?

Particularly, Iran enjoys a high potential for solar radiation up to 5.5 kWh/m² /day where implementation of solar power plants is completely feasible and affordable . Due to great access to solar energy, several studies have evaluated the potential of generating electricity from this abundant and clean source of energy.

Can solar PV systems be used in residential sectors of Iran?

Zandi et al. (2017) proposed four scenarios to use solar PV systems in residential sectors of Iran. All the scenarios were studied using RETScreen software. In addition, the economic aspects and environmental impacts of the scenarios were examined.

How much does a solar power plant cost in Iran?

The guaranteed purchase tariff rates announced by SUNA in May 2016 . Official exchange rate for the US dollar announced by the Central Bank of Iran on September 1, 2016. The basic price for an average of different install capacities of PV power plants was 7290 IRRs/kWh in 2015 and 5940 IRRs /kWh in 2016 and 2017 .
