Do you need a backup home generator?

With extreme weather events becoming more frequent, home generators have become fairly common for anyone who lives in a suburban area that often hit with power outages after storms, flash flood and more. Any of these can cause power outages for days or even weeks in some case. When power is cut off, the best solution is a backup home generator.

Should you buy a portable generator or a stationary generator?

For homeowners and small business owners thinking of emergency power supply, portable generators from 5Kw upwards are useful but sometimes it may be more economical to purchase a stationary system and power the whole house or business. Whether you need a Silent Generator, Small Generator, Petrol or Diesel Generator you'll find it here.
