Are Amerisolar solar panels good?

Amerisolar solar panels are practically good, even on the hottest days. They are competitive not only for the price but for their reliability and won't let you down. I trusted local electricians for their installation. For a larger solar project (3.7MWp), we bought 280W/285W Amerisolar panels, but the outcome was really bad.

Is Amerisolar a good solar panel brand?

The reviewer mentions that the Amerisolar panels are reliable and had no issues at all. They also praise the production quality. However, the passage primarily focuses on the complaint and warranty management with Amerisolar being worse than expected. This part is not directly related to the quality of the panels and should be ignored.

Is it time to install solar panels in the Manx?

Even on a bright Manx winters day a panel can generate a considerable amount of electricity (perhaps 30% of capacity). There is something very satisfying about receiving an energy bill from Manx Utilities which is not only zero, they might pay you because of excess energy sold to the grid. There has never been a better time to install solar.
