

# Italy's new energy storage field

Does Italy need electricity storage?

As Italy's energy mix is increasingly composed of variable renewable energy sources, electricity storage will be needed to integrate power generated by renewables into the national grid and make it available when sun and wind energy are not accessible.

Could Italy's grid-scale battery storage market see a massive expansion?

Grid-scale battery storage | Cameron Murray writes about the nascent market for large-scale battery storage in Italy, which could see a massive expansion in the short term. Italy's grid-scale energy storage market: a sleeping dragon. Render of a co-located battery storage project in Italy from Innovo Group. Credit: Innovo Storage smart power

Are energy storage systems becoming more popular in Italy?

Terna, the Italian TSO who monitors energy storage installation trends in Italy, has recently confirmed this growing demand for storage systems. Terna have published statistics relating to the type and frequency of storage systems being constructed.

How will Italy develop utility-scale electricity storage facilities?

To develop utility-scale electricity storage facilities, the Italian Government set up a scheme that was approved by the European Commission at the end of 2023. Italy will promote investments in utility scale electricity storage to reach at least 70 GWh, and worth over Euro 17 bn, in the next ten years.

Does Italy have a national energy and climate plan?

To meet the European Union (EU)'s energy and climate greenhouse gas emissions targets by 2030, EU countries need to establish a 10-year integrated national energy and climate plan between 2021 and 2030. Italy has one in place called PNIEC.

Can energy storage systems be integrated with power production plants?

The integration of energy storage systems with power production plants, especially renewable plants, has been growing rapidly in recent years. This is because the installation of storage systems maximises the efficiency of renewable plants by regulating electricity flow and reducing energy waste and costs.

Field also recently announced its expansion into Italy, with the aim of building a multi-gigawatt portfolio in strategic locations across the country. ... Trina Storage, a global leader in advanced energy storage solutions, will supply Field Newport with a fully integrated battery system. Trina Storage's battery solution will include Tier-1 ...

The new licence is for the depleted Hewett gas field located 20 kilometres (12.4 miles) offshore Bacton, in the southern North Sea sector of Britain. It follows the one obtained by the Italian group in the Liverpool Bay

## Italy's new energy storage field

Area in 2020, where Eni is the carbon dioxide transport and storage operator for the so-called HyNet North West project.

Italy had 650,007 grid-connected energy storage systems at the end of June 2024, according to Italian PV association Italia Solare, with a total of 4.5 GW of rated power. "During the first half ...

Enel Green Power will start building 1.6GW of battery storage projects in Italy this quarter, with the country's utility-scale market expected to soar in the next three years. The renewables arm of multinational energy firm ...

The logo of Italian energy company Eni is seen at Eni's Renewable Energy and Environmental R&D Center in Novara, Italy, September 26, 2019. ... Oil & Gas Coal Thermal Power Solar Wind Power Hydropower Nuclear Power Power Grid Hydrogen Geothermal. Energy Storage Energy Efficiency New Energy Vehicles Energy Economy Climate Change Biomass ...

Founded in 2021, Field develops, builds and operates the renewable energy infrastructure needed in the UK and Europe to reach net zero. Following its launch in Italy last year, the business will deploy battery storage in Spain, driving progress towards the country's 2030 clean power target and deployment goals for renewable energy.

Gestore Servizio Energetici ("GSE") is the state-owned company which promotes and supports renewable energy in Italy. In particular, GSE fosters sustainable development by providing support for renewable electricity generation and renewable energy storage, and by taking actions to build awareness of environmentally-efficient energy uses.

According to data released last week by Italian solar energy association Italia Solare, Italy's independent energy storage installations surged in the first half of 2024, with a connected capacity of approximately 650MW, almost 10 times that of the same period in 2023. ... (71GWh) of new grid-scale energy storage capacity by 2030 to increase ...

On December 10, 2023, Legislative Decree No. 181 of December 9, 2023 (L.D. No. 181), approving measures on energy security, the promotion of renewable energy sources, and support for energy-intensive businesses and reconstruction in territories affected by floods, entered into effect in Italy. L.D. No. 181 contains measures to promote the self-production of renewable ...

In 2023, residential energy storage continued to dominate Italy's energy storage landscape, representing the largest application scenario for newly added installations. Residential PV systems retained their prominence, ...

Transmission system operator (TSO) Terna estimates Italy will need 9GW/71GWh of new energy storage to integrate its growing renewables pipeline, an average duration of just under 8 hours. That duration will be split

between battery energy storage system (BESS) and select pumped hydro energy storage (PHES) projects, though even on the BESS ...

PV module manufacturer Trina Solar has deployed its first energy storage project in Italy, for its project development arm. Energy Vault and municipality developing gravity-plus-BESS project at coal mine in Italy ... W&#228;rtsil&#228;; completes "worst-case scenario" fire tests on battery storage under new procedure. Ormat and esVolta secure tax ...

BESS, or battery energy storage systems, are an essential element of the energy transition: the Enel Group is playing an important role in the growth of the sector, in Italy and in the other countries where it is present. ...

The installation of the storage, metering and communication systems has been completed in March 2018 for all the pilots identified. Regarding the supporting storage technology, lithium-ion (Li-ion) and lithium-iron phosphate (LiFePO<sub>4</sub>) batteries have been chosen, since they offer high-energy conversion performance, long lifetime and low self-discharge rate (preferable ...

Located in Avetrana in the Province of Taranto, Italy, Torre di Pierri is a 9.3 MWh standalone system that supports grid stability and arbitrage. Trina Storage was contracted by Trinasolar ISBU for the provision of the battery energy storage system, representing the first time the former has delivered a utility-scale energy storage project in ...

successful Italian company offering energy storage systems (ESS, Energy Storage System), ... advanced energy storage systems chain. In line with that approach, the new Energy facilities became operational in April 2022, and will enable large-scale production. ... optimising the energy of an agri-voltaic field and a photovoltaic one; the one ...
