

Could solar power be a new source of growth in Japan?

The rise of solar power could give them a new source of growth. Solar power has become the largest source of clean energy in Japan this year. Interest among households has been strong, with more than 3mn residential solar systems installed last year. Demand for a similar number of residential batteries should follow soon.

How much does Japan spend on geothermal power?

Moreover, Japan International Cooperation Agency, JICA, says that it has financed 17 per cent of the world's geothermal capacity, or \$397bn (\$2.9bn), in Africa, Asia and Latin America. This includes \$99.6bn for Olkaria and its power transmission lines.

How does Tokyo contribute to African Development?

Tokyo's involvement in African development aims to focus on growth in exports, capital expenditure, and productivity. That means putting money into roads, ports, agriculture, manufacturing -- and renewable energy. "We have experience in assisting Asian countries in their development," Kato says.

Will Japan boost its presence in Africa?

Still, Japan is undeniably looking to boost its presence in African countries. At the seventh Ticad (Tokyo International Conference on African Development), held in Yokohama in 2019, late prime minister Shinzo Abe said Japan would boost private-sector investment in Africa by \$20bn.

What is the future of energy storage?

Local companies Toshiba, Itochu and Hitachi are among those betting on energy storage systems for growth. There is much potential in this relatively overlooked sector: the global battery energy storage market will reach as much as \$150bn by 2030, estimates McKinsey. Falling prices of battery cells should help wider adoption of home batteries.

Would Kenya have a geothermal power plant without Japanese technology?

"Without Japanese technology, there would hardly be any geothermal production in Kenya," says Iwasuke Shimada, managing director for Toshiba in Africa, as he watches steam emerging from a unit at Olkaria. The continent's first geothermal power station, Olkaria, is still increasing its output.

Thanks to low-interest, long-term loans from JICA, Kenya is at the forefront of geothermal energy production in Africa. And Japan's support for the country goes back almost 60 years, to...

A comprehensive annual overview of the state of renewable energy. Pumped storage remains the largest energy storage technology, with a total installed capacity of 179 GW in 2023. 144 ...

Africa REN has announced the financial close of its pioneering Walo energy storage project in Senegal. The

scheme is the first project-financed photovoltaic solar and battery energy storage system (BESS) to be built in ...

5 ???&#0183; The Sustainable Energy Fund for Africa (SEFA) welcomed Japan as a new donor, expanding its base to 11 contributors and boosting its capacity to support key energy projects. SEFA showcased investment-ready projects, ...

The program of RENPOWER Africa Energy Storage covers various key topics that involves the chain value of an energy storage project, from regulatory framework to how to develop a project, innovative technologies, ...

(Tokyo, Japan) 13 December 2023 - On November 23 2023, world-leading smart PV and energy storage solution provider, Trina Solar, signed a memorandum of understanding (MoU) with ...

21 ????&#0183; Japan targets 40-50% renewable energy by 2040; Nuclear power to account for 20% of Japan's 2040 energy supply; Thermal power to decrease to 30-40% by 2040, focus on ...

5 ???&#0183; The Sustainable Energy Fund for Africa (SEFA) welcomed Japan as a new donor, expanding its base to 11 contributors and boosting its capacity to support key energy projects. ...

Several African countries have formally expressed interest to join the groundbreaking Battery Energy Storage Systems (BESS) Consortium, launched Saturday during COP28, which could revolutionise Africa's energy ...
