

Jordan store electric system

Are there electrical outlets in Jordan?

Jordan's electrical system is based on 220 AC volts, 50 cycles and requires two-pronged wall plugs. There are electrical outlets in Jordan, but visitors from North America will need an adapter, which is available at most hotels.

How does electricity work in Jordan?

Virtually all electric power in Jordan is generated by thermal plants, most of which are oil-fired. The major power stations are linked by a transmission system. By the early 21st century the government had completed a program to link the major cities and towns by a countrywide grid.
