

Helping to Modernize Kosovo's Energy Sector. Today, Kosovo's electricity operating capacity is about 900 MW, almost all of which comes from two antiquated coal-fired power plants, Kosovo A and Kosovo B. As the population grows, ongoing constraints on power will continue to increase. In order to meet the growing demand for energy, reduce power ...

The EUR 75 million is the first tranche of money Kosovo will receive from the EU's Energy Support Package for the Western Balkans worth EUR 1 billion created by the EU and its Member States to help the region overcome the energy crisis and the major energy prices increase caused by Russia's unjustified and unprovoked full-scale invasion against Ukraine.

From renewable energy to hydropower to waste management, water is an inherent component of Kosovo's energy strategy and fundamental to the World Bank Group's energy engagement in the country. The World Bank supports Kosovo's water sector through the Kosovo Water Security and Canal Protection Project. The project, signed between the World ...
