

Which French company is supporting wave and anchoring studies in Laos?

French engineering company Innoseah has joined the ambitious project as a provider of support for wave and anchoring studies. The Nam Theun hydropower station in Laos. Image: EDF French energy giant EDF is planning the construction of a 240 MW floating solar power plant at the Nam Theun 2 Hydropower plant on the Nam Theun River, in Laos.

What is IES doing in Laos?

IES is working on this project in Sekong and Attapeu provinces, with plans to have the wind power complex up and running by 2025. The trio envisages taking on other renewable energy projects in Laos, including solar and biomass. IES has more than 1,900 MW of wind and solar assets in development and operation in Thailand, Japan, Laos and Vietnam.

Can storage support 100% renewable electricity futures in Southeast Asia?

This study is the first to explore the benefits of utilising STORES as a primary storage medium to support 100% renewable electricity futures in Southeast Asia. STORES can facilitate high penetration of variable solar and wind energy in electricity systems through energy time shifting and load levelling.

What is a gigawatt-scale wind farm in Lao PDR?

Wind turbines. Author: ??? - Photographer No.9. License: Creative Commons, Attribution-NoDerivs 2.0 Generic. A gigawatt-scale extension of a wind farm in Lao PDR is one of the developments planned by a new tripartite alliance aiming to bring renewable energy solutions to end-users in the ASEAN region.

Why should Laos invest in a floating solar plant?

"It's also a privilege to support Laos in the development of what is projected to be one of the world's largest floating PV plants." The solar plant will cover an area of 3.2km<sup>2</sup>, which corresponds to less than 1% of the reservoir's area at full supply level.

Which axes represent rated storage power & storage energy volume?

In Fig. 6 -a, the horizontal and vertical axes represent the rated storage power (GW) and the storage energy volume (GWh), respectively. In general, the storage requirements increase both in GW and GWh as the size of the electricity system increases.

The US industry installed 1,067MW of energy storage in Q4 2022, but just 48MW of those were categorised as commercial and industrial (C&I) or community-scale projects, according to a ...

A gigawatt-scale extension of a wind farm in Lao PDR is one of the developments planned by a new tripartite alliance aiming to bring renewable energy solutions to end-users in the ASEAN region.

Vanadium flow batteries could be a workable alternative to lithium-ion for a growing number of grid-scale energy storage use cases, say Matt Harper and Joe Worthington from Invinity ...

The energy regulator in Greece has cancelled the country's third large-scale energy storage procurement auction due to confusion over limits on how much power capacity could be bid in ...

Vanadium flow batteries could be a workable alternative to lithium-ion for a growing number of grid-scale energy storage use cases, say Matt Harper and Joe Worthington from Invinity Energy Systems.

According to the IEA, while the total capacity additions of nonpumped hydro utility-scale energy storage grew to slightly over 500 MW in 2016 (below the 2015 growth rate), nearly 1 GW of new utility-scale stationary ...

Large-scale integration of off-river, closed-loop pumped hydro storage is a new approach to providing system flexibility facilitating high penetration of variable renewable ...
