Energy purchased during off-peak hours can be stored using battery storage systems. It can be activated to distribute electricity when tariffs are at their highest, lowering energy expenses. Battery storage systems can also be set up as an uninterrupted power source, which is a useful insurance policy for enterprises.

Currently, there are thousands of companies globally involved in battery manufacturing, ranging from large multinational corporations to smaller, specialized firms. We present the largest and most influential battery manufacturers, exploring their market positions and strategies that have enabled them to dominate the industry.
