Does Lebanon have a long-term electricity supply?

In recent decades, the government in Lebanon has failed to provide the country with long-term electricity supplies. Electricity from the state supplier has come at irregular intervals and sometimes only for two hours a day. The EDL power plants regularly run out of fuel due to the ailing economy.

What happened to EPA power plant in Lebanon?

EPA Lebanon's state electricity company (EDL) announced on Saturday that it could no longer supply power after its last operational power plant exhausted its fuel reserves. The company said the situation would affect "essential facilities such as the airport, port, water pumps, sewage systems, and prisons."

What happened to electricity in Lebanon?

Along with Israel blockading the Lebanese coast, it led to the near exhaustion of fuel supplies. State electricity in Lebanon is available for a maximum of around four hours a day. Those who can afford it rely on expensive diesel-powered private generators to fill the gap, although very few provide power for 24 hours.

Why did Lebanese power plant shut down?

The Electricity of Lebanon said in a statement that the last group of production units at the Zahrani Power Plant, which supplies the country with electricity, went offline after running out of fuel. This led to a complete halt of electricity supply across all Lebanese territories.

Why did Lebanese power go out?

The August 17 power outage resulted from the government's failure to make overdue payments to the Iraqi government for supplying Lebanon with heavy fuel oil that the Lebanese government can then swap for fossil fuels compatible with Lebanon's power plants.

Should Lebanon recognize the right to electricity?

Lebanon should recognize the right to electricity and enact a strong strategy to implement it as rapidly as possible. Lebanon's government should take immediate steps to ensure that all residents have a continuous, accessible, clean and sustainable supply of electricity from renewable energy sources.
