

Who is Greenwood-power?

Greenwood-Power is specialized in designing and developing non-conventional instrument transformers for the medium voltage grid. Products are dedicated to a variety of applications, like gas insulated switchgear, air insulated switchgear, and outdoor installations, which have high resistance to harsh environmental conditions.

What is a Greenwood-power transformer?

These unique products are intended to cover all segments of the active distribution grid. Greenwood-Power is specialized in designing and developing non-conventional instrument transformers for the medium voltage grid.

Why should you choose Greenwood power?

We have already developed numerous, highly innovative, and award-winning voltage and current sensors. Our broad and deep experience in the instrument transformer field, especially for non-conventional instrument transformers, allows Greenwood Power to bring the best sensors, with the best features, at the lowest costs, to the global marketplace.
