

What is Madagascar's energy mix?

In 2019, Madagascar's energy mix was dominated by biofuels and wastes (85%), with oil products (11%), coal and hydro accounting for the rest of the total energy supply. In 2020, less than 5% of the population had access to clean cooking and 27% had access to electricity.

How much energy does Madagascar use?

Madagascar's energy balance shows that about 80% of its overall energy consumption is based on biomass (mainly firewood 68%, charcoal 10% and other biomass 2%), 17% on petrol (transport), 2% on electricity (hydropower and diesel power plants) and 1% on coal. Until today the petroleum products are all imported.

What will esogip do for Madagascar?

The ESOGIP will aid Madagascar's government to decrease energy loss, increase energy efficiency, raise the ratio of renewables in the domestic energy mix, develop its governance of the energy sector, and improve operational performance of Jirama, Madagascar's state-owned electric utility and water services company.

Does Madagascar have a strong energy network?

Of Madagascar's 27 million inhabitants, 63% live in rural areas according to data by the World Bank from 2018. This leaves the country with the difficult task of creating a stable, pervasive energy network in order to supply the majority of the population with electricity.

Does Madagascar have oil?

Even though Madagascar has oil in place the oilfields are not being exploited yet. The energy consumption per head is around 0,2 tons oil equivalent, which is one of the lowest in the world. Access to electricity remains low with about 20% of the total population having access to this form of modern energy.

How many people have access to electricity in Madagascar?

Access to electricity remains low with about 20% of the total population having access to this form of modern energy. In the rural areas, only about 5% have access to electricity. The installed capacity of electricity production in Madagascar accounts accordingly for some 650 MW only (production in 2008 = 486 GWh).
