

What is Malaysia's national energy transition roadmap (Netr)?

Malaysia's National Energy Transition Roadmap (NETR) sets an ambitious commitment for the country to reach 70% renewable capacity in the energy mix by 2050, with solar power as the dominant source and gas utilised as the transitional fuel away from baseload coal.

Is Malaysia poised to become a regional leader in energy transition?

NSTP/SAIFULLIZAN TAMADI KUALA LUMPUR: Malaysia is poised to become a regional leader in the energy transition and renewable energy industry as a result of the introduction of the Hydrogen Economy and Technology Roadmap (HETR) and the implementation of the National Energy Transition Roadmap (NETR).

What is Malaysia's Energy Transition outlook?

It also presents sector-specific technological pathways and investment opportunities that will help Malaysia to accelerate its energy transition. The Malaysia energy transition outlook provides a comprehensive, renewables-focused, long-term energy pathway for the transition to a cleaner and more sustainable energy system in Malaysia.

Does Malaysia have a transition pathway to clean electricity?

The transition pathway provided in a Malaysia-specific energy transition study by the International Renewable Energy Agency (IRENA) is used as a benchmark to demonstrate that a pathway to clean electricity can deliver increased affordability and security benefits for the country.

What will Malaysia's Energy Future look like in 2035?

Malaysia's renewable energy under the National Energy Transition Roadmap is expected to contribute 29% of the generation mix in 2035, while fossil fuels will account for 71%. Malaysia is an upper-middle-income country in Southeast Asia.

Should Malaysia quadruple solar power generation by 2035?

However, by quadrupling solar power generation by 2035 to align with the IRENA pathway, Malaysia can also bolster energy security and introduce affordability benefits to the power sector transition. Peninsular Malaysia's twin demand peaks demonstrate that solar power is the feasible option for Malaysia to transition away from fossil fuels.
