

The Marshall Islands - a Context 1. The Republic of the Marshall Islands (RMI) is one of the worlds lowest-lying and climate vulnerable countries. It is a coral atoll nation comprising 1,156 individual islands/islets and 29 different atolls with an average elevation of just six feet

4) "Typhoons only hit the northwestern Marshall Islands so those on other islands do not need to prepare." It is a myth that only Ujelang and Enewetak atolls are at risk for typhoons. While the northwestern Marshall Islands are closer to the Micronesian Typhoon Track - other cyclonic and extratropical storms have hit the
