Who is Mexico Energy Partners?

Sign up for the latest insights on the energy sector in Mexico. © 2024 Mexico Energy Partners LLC. Mexico Energy Partners is the leading US-based energy consulting firm in Mexico. Our consulting services include power purchase agreements, energy efficiency studies, renewable energy procurement, and onsite solar power (distributed generation).

What is the energy mix in Mexico?

The electricity mix in Mexico is dominated by fossil fuels, which contribute around 79% to the total primary energy; renewable energies contribute 16.5% (hydropower 13.5%, geothermal 3% and wind 0.02%) and the remaining 4.8% is from nuclear power.

How does energy procurement work in Mexico?

Our energy procurement services provide companies with strategic options to secure the best electricity rates. Whether through Power Purchase Agreements (PPAs), on-site renewable energy installations, or energy efficiency audits, we guide businesses through Mexico's dynamic energy landscape.

Why is energy storage important in Mexico?

Renewable energy resources like solar and wind fluctuate, making energy storage systems (ESS) indispensable for balancing supply and demand. In Mexico, which has abundant solar and wind resources, energy storage facilitates the efficient use of generated renewable electricity.

What is the Latin America Energy Outlook?

The Latin America Energy Outlook, the International Energy Agency's first in-depth and comprehensive assessment of Latin America and the Caribbean, builds on decades of collaboration with partners. In support of the region's energy goals, the report explores the opportunities and challenges that lie ahead.

What data is available for the Latin America Energy Outlook 2023?

Data is available for mining, electricity generation capacity, natural gas and oil infrastructure, as well as the vulnerability of these resources and energy supply infrastructure to climate impacts in the region. This information is based on IEA analysis carried out within the framework of Latin America Energy Outlook 2023.
