

Chikumbutso explained that his generator is a "Microsonic Energy Device". It generates half a megawatt which can power about 300 homes. Chikumbutso said the generator is powered by "the natural energy that God put in the air, the radio frequency".

It is powered by a Micro-Sonic Energy Device (MSED). The MSED is a technology that generates electrical power by converting high radio frequency energy directly into electricity. The MSED is both a renewable energy with Zero Emission.

It is powered by a Micro-Sonic Energy Device (MSED). The MSED is a technology that generates electrical power by converting high radio frequency energy directly into electricity. The MSED is both a renewable energy with ...

Chikumbutso explained that his generator is a "Microsonic Energy Device". It generates half a megawatt which can power about 300 homes. Chikumbutso said the generator is powered by "the natural energy that God ...

Although there have been public showcases of some of Chikumbutso's "microsonic energy devices" introduced as early as 2015 in Harare, Zimbabwe, under the company name Saith Technologies, there is no evidence of independent research to document if, or how, this green power technology works.

Chikumbutso explained that his generator is a "Microsonic Energy Device". It generates half a megawatt which can power about 300 homes. Chikumbutso said the generator is powered by "the natural energy that God put in the air, the radio frequency". He explained that because the machine does not run on solar energy, it is not affected by ...
