

What is Mozambique's energy transition plan?

REUTERS/Eduardo Munoz/File Photo Acquire Licensing Rights CAPE TOWN, Nov 27 (Reuters) - Mozambique has approved an ambitious new energy transition plan until 2050, hoping to attract investments of some \$80 billion to boost renewable energy capacity and increase electricity availability, a senior energy official said on Monday.

What will Mozambique's energy transition look like in 2050?

Mozambique's energy transition will require major investments in new technologies associated with electric vehicles, green hydrogen, digitalisation and training young people. "We estimate that more than \$80 billion in public and private investment is needed by 2050.

How can Mozambique contribute to a green energy transition?

Studies have indicated that this could a 60% reduction in the country's aluminium exports and a 2.5% decrease in the country's GDP. On the other hand, Mozambique also has unrivalled natural energy resources that could significantly contribute to a green energy transition, not only domestically but also in the Southern African region.

What will Mozambique do at cop27?

At COP27, the government of Mozambique supported by NDC Partnership, the Tony Blair Institute for Global Change and Enabel will host a panel discussion to highlight the significant role the country's unique renewable energy assets can play in the domestic, regional and global energy transition.

Should Mozambique be included in the energy transition debates at cop27?

When unattended, however, it is estimated that the country's energy sector emissions could increase fivefold from 17 MtCO₂e/year in 2020 to almost 85 MtCO₂e by 2050. And there are more reasons why ignoring countries like Mozambique in the energy transition debates at COP27 might be ill-advised.

Will Mozambique harness its natural gas resources?

Speaking on the third day of the COP28 UN climate conference, President Nyusi said Mozambique will still harness the potential of its offshore natural gas reserves in a diverse energy mix that will also exploit its abundant hydroelectric, wind and solar resources.
