The Improved Cookstove Program, jointly initiated by Imperative Global Projects and Sustainable Prosperity Initiative Nepal (SPI-Nepal) and currently in the design phase, is expected to assist tens of thousands of households to have access to improved cookstoves.

Sustainable Prosperity Initiative (SPI) Nepal is an independent climate action investor and project developer, and research organization with unique expertise in voluntary carbon market (VCM) and a track record of shaping and influencing national climate and renewable energy policies.

SPI-Nepal and Imperative have been working closely to implement activities related to the program in two regions of Nepal. Recently, a Project Design Consultation meeting was concluded in three different regions ...

Sustainable Prosperity Initiative (SPI) Nepal is a professional firm established in 2001, working mainly in development programs including climate action projects. In partnership with national and international agencies, SPI Nepal is currently developing and implementing clean cooking carbon projects in Nepal.

Initiated by Sustainable Prosperity Initiative Nepal (SPI-Nepal), a meeting of different stakeholders agreed to establish an Association of institutions engaged in the voluntary carbon trade in Nepal as VCM can ...

SPI Nepal is currently focusing on clean cooking, carbon financing, energy transition and policy advocacy for the sustainable development and prosperity of Nepal. She was engaged in Asia Market Assessment of Innovative Sanitation Technologies (especially Reinvented Toilets and Omni Processors) in Indonesia and Pakistan for Bill and Melinda ...

Initiated by Sustainable Prosperity Initiative Nepal (SPI-Nepal), a meeting of different stakeholders agreed to establish an Association of institutions engaged in the voluntary carbon trade in Nepal as VCM can mobilize FDIs (by providing financing for climate mitigation projects) for climate change mitigation.

SPI-Nepal and Imperative have been working closely to implement activities related to the program in two regions of Nepal. Recently, a Project Design Consultation meeting was concluded in three different regions - Kathmandu, Terai, and Hilly region.

Nepal spi energy company

With the commitment of providing more than 200,000 improved cookstoves to households still using 3-stone or traditional stoves in the Terai and Hilly regions of Nepal, we are not only lowering...
