

Infratec general manager Nick Bibby said that the storage system is "the first of its scale to be built in New Zealand". As reported by Energy-Storage.news, the two companies completed their assessment of the project in late 2021, selecting a site in Huntly, a town in the Waikato District.. They then announced the appointment of key contractors in March of last ...

Sigora is making use of solar PV, supplementing that with diesel-based power generation as needed, and integrating that with intelligent battery energy storage and smart metering communications technology. The ...

New rankings by Ernst & Young (EY) of the most attractive markets for renewable energy investment by country include battery storage, with the US, China and UK as frontrunners. The global professional services firm's Renewable Energy Country Attractiveness Index (RECAI), published every six months, ranks the top 40 countries and provides ...

Development of New Energy Storage during the 14th Five -Year Plan Period, emphasizing the fundamental role of new energy storage technologies in a new power system. The Plan states that these technologies are key to China's carbon goals and will prove a catalyst for new business models in the domestic energy sector. They are also

In the past few months Spain has announced a 2.5GW energy storage target by 2030 and Portugal is hosting a solar tender with a significant add-on option for storage. Clean Horizon's experts Corentin Baschet and Tanguy Poirot spoke with Andy Colthorpe on the role batteries and other storage can play in the Iberian Peninsula's energy transition in the present ...

According to the International Energy Agency (IEA) and BloombergNEF, battery storage was the most invested-in energy technology in 2023 with the biggest-ever annual growth in deployments recorded. The organisations have each just published a new report apiece, the IEA focusing on battery storage and BloombergNEF on the wider energy storage market.

New opportunities emerge to offer stable revenues as the need for storage in Europe is rampant. As markets in Europe gain in complexity and require extensive trading measures, some opportunities such as capacity auctions and storage-related tenders help ensure a "stable" revenue that supports financing decisions and mitigates market risks.

A multilateral solar energy project is taking shape in the Champ de Mars region of Haiti. GENINOV Group, a Canadian firm that has operated a subsidiary in Haiti since 2009, delivered a 100 KW solar system to the Cellule Energie and Electricity of Haiti (EdH) of the Ministry of Transport (MTPTC) to illuminate various parts of Champ de Mars.The project was ...

Key Capture Energy's KCE NY 1 project in Upstate New York. Image: Key Capture Energy. Update 10 September 2021: A Key Capture Energy representative told Energy-Storage.news that SK E& S anticipates investing a billion US dollars into KCE. The representative said that the money will go towards building the team and developing, constructing and ...

New Fortress Energy announced that it has completed the sale of its 20% equity interest in Energos Infrastructure ... storage, and regasification of LNG through long-term contracts, helping to power countries around the world and reduce their reliance on oil and coal, enhance energy security and reliability, and enable potential cost savings ...

In 2017, the Government of Haiti exempted solar modules and inverters from import duties, although some customs fees still remain. Solar energy powers agricultural work (irrigation, conservation of agricultural products), hotels, hospitals, schools, commercial endeavors (food storage), and some public lighting in cities and villages.

Energy technology company ZOLA Electric announced the partnership with local renewable energy pioneer Haiti Green Solutions for the deployment of its flagship energy technology platform to help address the ...

71GWh of new grid-scale energy storage needs to be deployed by 2030 for Italy to decarbonise its energy system in line with the EU targets. Skip to content ... is in addition to distributed energy storage resources and large-scale projects already procured through past capacity market and ancillary service auctions. However, it added the ...

Following the success of the PV ModuleTech Bankability Ratings report - released by our market research team in 2019 for solar module buyers - we adapted the core methodology of this report to form a new dedicated quarterly report to cover the leading energy storage system (ESS) manufacturers and solutions suppliers in the sector.

The US Trade and Development Agency (USTDA) is promoting a Request for Proposals (RfP) to US companies to design, build and install hybrid solar PV and energy storage microgrid generation systems in Haiti. The RfP is ...

After another record-breaking year, in which the US surpassed 1GWh of deployed energy storage and China began its programme of building flow batteries several hundred megawatts in size each, we canvassed opinion on what 2018's biggest challenges and successes were. In doing so we also look ahead to what this year, 2019, will hold, from the ...
