

What is Nissan xStorage?

xStorage by Nissan is a home storage unit that uses Nissan's electric vehicle batteries. These batteries can be controlled to decide how and when the energy is used, giving you tools to reduce energy costs by controlling when energy is taken from the grid and reducing peak consumption. The batteries have a 'second life' in this application after their use in electric vehicles.

How much does a Nissan xstorage home cost?

'xStorage Home units - which provide a sustainable second life for Nissan's electric vehicle (EV) batteries after their first life in cars is over - will be priced competitively starting at EUR3,500(excluding VAT and installation costs) for a power capacity of 3.5kW rising to just EUR3,900 for 6kW.

What is xStorage?

xStorage is a portfolio of energy storage solutions that gives Nissan's electric vehicle batteries a 'second life'. It provides safe, reliable, and sustainable energy for your home.

Does Nissan offer energy storage in Europe?

Nissan together with its energy storage partner - Eaton announced further extension of its ESS (energy storage solution battery) offer in Europe to include several residential, buildings and grid options. All units available with 3 or 6 kW power output.

What makes Nissan a great energy storage company?

We bring a depth of experience to the energy storage sector that is unmatched. Nissan is the leader in electric vehicles and as such is a proven, high volume, maker of reliable Li-Ion batteries that meet the strict safety standards of the automotive market.

How does Eaton Nissan xstorage buildings work?

Eaton Nissan xStorage Buildings selects the right power sources according to the load, the grid constraints and the availability of renewable energy. This system allows end users to store energy so that it can be used on demand to power the business or to participate in demand response programs - selling energy back to the grid.
