

A leader in power conversion technology, OmniOn Power™ partners with customers to deliver reliable solutions that power their businesses both today and well into the future. Our expertise and support provide peace of mind as we guide customers through changing industry landscapes.

Welcome to our OmniOn Power "Supplier Resource Hub. In this site you will find documents and links that provide information and advise of our expectations of the suppliers carefully selected to work with our company to provide the best quality power equipment and services to our customers. Our suppliers are expected to:

OmniOn Power is a customer-first provider of innovative critical power solutions. Our product portfolio is designed for high reliability and performance, and our services team is a trusted partner with exceptional domain expertise backed by a proven track record. Are you ready to take the next step? Join our team and help power life's everyday moments.

OmniOn Power(TM) is a leading global technology company that energizes the transformation of society and industry to achieve a more productive, sustainable future. By connecting software to its electrification, robotics, automation and motion portfolio, OmniOn Power pushes the boundaries of technology to drive performance to new levels.

The Power Conversion division, formerly Lineage Power, was acquired by ABB as part of the GE Industrial Solutions acquisition in 2018 and is not core to ABB. The division is based in Plano, Texas, USA, and employs roughly 1,500 employees worldwide, predominantly at three major sites and the US headquarters.

OmniOn Power(TM) is a leader in power conversion technology, dedicated to delivering reliable solutions that empower businesses today and into the future. By partnering with customers, OmniOn Power(TM) leverages its industry expertise to provide guidance through the ever-evolving power landscape, ensuring sustained success. ...

peace of mind as they guide ...

Can be configured as a +24V or -48V single-voltage power system or as a "dual-voltage" power system. Primary voltage capacity of 1,600A at 24V and up to 1,600A at 48V. Temperature-hardened for use in -40C to +75C environments, and compact base system with four power shelves occupies 18RU of 23" wide, 21" deep rack space.

OmniOn Power, previously known as ABB Power Conversion and recently acquired by AcBel Polytech Inc., provides high quality products, expertise, and partnership to customers in the most...

A leader in power conversion technology, OmniOn Power TM partners with customers to deliver reliable solutions that power their businesses both today and well into the future. Our expertise and support provide peace of mind as we ...

OmniOn Power DC power solutions include DC systems, battery charging systems, controllers & BDFBs BDCBBs across telecom, data center and industrial applications. Solutions . Solutions (opens in a new window) End-to-End Solutions; Data Center/Wireline; 5G/Wireless ...

Specializing in high-quality power solutions, OmniOn Power(TM) offers products that cater to the increasing infrastructure demands of mission-critical industries. Their offerings span the power spectrum, from building-level systems to board-level components, ensuring comprehensive support for diverse applications.

BPS-Flex power systems provide advanced controller features in compact, cost-efficient footprints. The BPS-Flex system is comprised of a 1RU rectifier shelf that is combined with one or more 1RU distribution panels, providing options for pluggable DC breakers up to 100A, GMT fuses, and small form breakers up to 30A.

This white paper addresses how switch mode rectifier (SMR) battery chargers enable new strategies for substation DC power reliability and protection. It describes how this new generation of modular and scalable chargers, enable "one-charger redundancy" back-up power for their critical DC power loads.
