

Palau photovoltaic power station

What is a solar PV project in Palau?

With a capacity of 15.3 MWp solar PV and 12.9 MWh BESS, the project supports Palau's goal of achieving a 45% renewable energy share by 2025. The project's total investment of USD 29 million contributes to Palau's energy independence, clean power generation, carbon emissions reduction, and local employment opportunities.

Where is Palau's first solar power plant located?

We're proud to have supported the establishment of Palau's first utility-scale solar power plant at Ngatpangon Babeldaob. energy storage system, was undertaken by Solar Pacific Pristine Power, a privately owned company.

How will solar energy be produced in Palau?

Solar electricity will be produced by a hybrid 15.3 MWdc (13.2 MWac) solar photovoltaic (PV) plus 10.2 MWac/12.9 MWh battery energy storage system facility. Extensive safeguards to protect Palau's pristine environment SPEC did not leave any stone unturned to protect the pristine Palau ecosystem.

Who is launching Palau's first solar PV + battery energy storage system?

Alternergy Holdings Corp. and its subsidiary Solar Pacific Energy Corporation have inaugurated Palau's first solar PV + battery energy storage system (BESS) project, marking a significant milestone in the region.

Does Palau rely on fossil fuels?

As a small island developing state, the Republic of Palau sought to wean itself off its dependence on fossil fuel for power, which accounts for 99.7% of the country's power generation. To address this issue, Palau invited Solar Pacific Energy Corporation (SPEC), Alternergy's solar developer, to develop a clean, renewable energy source.

What will Palau's solar PV project do?

The project, which is also Palau's first grid-scale solar PV plant, will contribute significantly to the country's nationally self-determined contribution to meeting global climate targets as agreed in the Paris Accord. These include reaching 35% renewable energy, and reducing energy sector emissions to 22% below 2005 levels, by 2025.

After a competitive RFP process, SPEC was awarded a Power Purchase Agreement (PPA) in April 2021 to supply 23,000 MWh annually to Palau Public Utilities Corporation (PPUC). Solar electricity will be produced by a hybrid 15.3 MWdc (13.2 MWac) solar photovoltaic (PV) plus 10.2 MWac/12.9 MWh battery energy storage system facility.

Palau has committed renewable energy targets (RETs), driven by the nation's reliance on high-cost diesel

generation and strong environmental principles. The supply of affordable and clean renewable energy development is fundamental to achieve Palau's goals.

ENGIE is building what's billed as the world's largest, solar power-energy storage microgrid for the government of Palau. With 100 MW of power generation and distribution capacity, the Armonia microgrid will enable Palau to meet its ...

It is located in Ngatpang state, on Babeldaob, the Republic of Palau archipelago's largest island. Developer SPEC has a long-term power purchase agreement (PPA) in place with the country's utility provider, Palau Public Utilities Corporation (PPUC), for the system to feed power into the Babeldaob grid network.

An AIFFP-funded solar power plant and battery storage facility has been officially inaugurated in Palau. The plant, comprised of 15.28 MWp of solar power generation and a 12.9MW battery storage facility, is at Ngatpang on ...

The hybrid system is set to supply approximately a quarter of Palau's energy requirements, substantially contributing to the island nation's energy portfolio. The plant combines a 15.28MWp (13.2MWac) solar PV ...

The Pacific island country of Palau has welcomed the commissioning of its first large-scale solar-plus-storage project, representing the largest power plant of its kind in the Western Pacific region.

An AIFFP-funded solar power plant and battery storage facility has been officially inaugurated in Palau. The plant, comprised of 15.28 MWp of solar power generation and a 12.9MW battery storage facility, is at Ngatpang on Babeldaob, Palau.
