

Paneles solares on grid Belgium

How do solar panels work in Belgium?

In Belgium there are two main types of solar panels. Solar Thermal Panels: these harness the sun's heat to produce hot water and heat homes. Equipped with sensors capturing up to 90% of sunlight, these panels transport heat to a water tank for storage, ensuring a continuous supply of hot water, even on overcast days.

How many solar panel installers are there in Belgium?

Belgian solar panel installers - showing companies in Belgium that undertake solar panel installation, including rooftop and standalone solar systems. 684 installers based in Belgium are listed below.

Are solar panels free in Brussels?

You can also have solar panels installed free of charge, thanks to third-party investors, an initiative that makes solar panel installation even more accessible and affordable for everyone. No power? Everything you need to know about installing solar panels on the roof of your home or business in the Brussels region.

Are solar panels a good investment in Belgium?

As soon as you install your solar panels, you'll notice a reduction in your electricity bill. Today, photovoltaics is an affordable investment for all Belgian households. The price of panels has fallen sharply over time (divided by 6 in 10 years!).
