

Paraguay solar power business plan

Will Paraguay develop more solar and wind power projects?

The country plans to utilize a mix of renewable energy sources going forward to diversify its energy mix and increase its energy security. While scarcely existent today, Paraguay hopes to develop more solar and wind power projects in the future.

What is Paraguay's renewable energy target?

Paraguay established renewable energy targets in its National Development Plan 2014-2030. The country's goal is to reach 60% of renewable energy in total energy consumption by 2030. By the same year, Paraguay aims to reduce by 20% the share of fossil fuel within its total energy consumption.

What is the main energy source in Paraguay?

From the perspective of energy demand, the main energy source is biomass (44%), followed by hydrocarbons (40%) and, in a distant third place, electricity (16%). The main source of energy produced in Paraguay is thus the least used in the country.

Who owns the energy in Paraguay?

Itaipu; alone typically provides over 80% of the energy consumed in Paraguay. It is a binational hydropower plant owned jointly with the government of Brazil (Itaipu; Binational). Acaray is owned by the state-owned generation and distribution company, ANDE, while Yacyretas; is owned jointly with the government of Argentina (Yacyretas; Binational Entity).

What is the Atlas of the solar and wind energy potential of Paraguay?

The Atlas of the solar and wind energy potential of Paraguay is one of the tools developed by Itaipu to make visible data of great relevance for developers of these technologies interested in new generation projects in this country. That document reflects a promising future for solar technology.

Why is Paraguay a renewable country?

Paraguay has one of the highest proportions of renewable energy in South America. Hydropower constitutes around 99.5% of the installed electricity capacity. This makes it highly dependent on the rivers that feed the country's main hydroelectric plants, from where most of the electricity produced is exported to neighboring countries.
