

Abstract: This paper proposes a hybrid constant power generation - power ramp rate control (CPG-PRRC) scheme to regulate the ramp-rate of the power injected into the grid by a cluster ...

This paper proposes a cost-effective control strategy to limit the power ramp-rate for two-stage grid-connected PV systems. The main concept of the proposed scheme is to modify the ...

power ramp rate control (PRRC) strategy that mitigates the fluctuating PV power at the dc-side before transmitting it to the grid during positive and negative irradiance changes. The ...
