

Powercell group Brunei

Who is PowerCell group?

PowerCell Group develops and manufactures fuel cell stacks and fuel cell systems with uniquely high power density. Our products are used in a wide range of industries, including aviation, marine, on- and off-road. PowerCell's products run on hydrogen and generate electricity and heat with no emissions other than water.

How does PowerCell work?

PowerCell Group products generate electric power with minimal environmental impact using zero-emission hydrogen fuel cell technology. Power Generation System 5 is a hydrogen fuel cell system developed to create electricity in an environmentally friendly, silent, and reliable way.

What are the different types of PowerCell products?

The system has a durable construction meant to ensure lasting and reliable use over time. The product is available in three different power output alternatives: 60, 80 and 100 kW. PowerCell Group products generate electric power with minimal environmental impact using zero-emission hydrogen fuel cell technology.

What is PowerCell p System 100?

PowerCell Group products generate electric power with minimal environmental impact using zero-emission hydrogen fuel cell technology. P System 100 is a powerful fuel cell system with 100 kW of maximum power and integration into a wide range of hydrogen inlet pressures.

Who is Powercell Sweden AB?

PowerCell Sweden AB was founded in 2008 as an industrial spin-out from the Volvo Group. Since 2023, the company's shares (PCELL) have been listed on Nasdaq Stockholm. PowerCell is committed to become the hydrogen-electric industry's leading enabler of the zero-emission society.

Is PowerCell listed on the NASDAQ?

Since 2023, the company's shares (PCELL) have been listed on Nasdaq Stockholm. PowerCell is committed to become the hydrogen-electric industry's leading enabler of the zero-emission society. PowerCell is a place where people come together to contribute to making unrealistic ambitions come to life.
