Who is PT Sungold solar?

PT SungoldSolar Power, the Indonesian subsidiary, is established and the U.S. business is further expanded. Since 2008, Sungold Solar has grown over the past 16 years to become the leading China Solar Panels Supplier for the US. Learn more about our journey and commitment to quality.

What services does Sungold solar offer?

At Sungold Solar, we offer a comprehensive range of services designed to meet the growing demand for solar energy solutions: We specialize in producing high-quality solar panels, including glass laminated modules, semi-flexible panels, and portable folding modules.

Is it time to install solar panels in the Manx?

Even on a bright Manx winters day a panel can generate a considerable amount of electricity (perhaps 30% of capacity). There is something very satisfying about receiving an energy bill from Manx Utilities which is not only zero, they might pay you because of excess energy sold to the grid. There has never been a better time to install solar.

Why should you choose sungoldpower inverters?

The high quality SunGoldPower inverters will improve your mobile living, indoor and outdoor life. SunGoldPower will do everything possible to ensure that each of our customers has a positive shopping experience.

"The solar farm would generate enough power to meet more than 7% of the Isle of Man's current electricity demand and support the Government's aim for electricity on the Island to be 100% green by 2030." The project represents an investment of around £30m across the 40-year anticipated life of the project, with no public investment.

Douglas council is to start producing its own sustainable solar energy. The local authority has approved funding for a solar farm to power some of its facilities. The generation facility would be built in Braddan and have a life span of around 20 years. It's thought the savings will mean it'll effectively pay for itself within five to seven years.

A Battery System can make full use of the power generated by your solar panels, ensuring that any unused power is stored on site to be used later when needed. If your electricity is supplied with two rates (a day rate and cheaper night rate), the solar + battery combination ensures that peak rate electricity usage is kept to a minimum.
