

Raid battery backup unit Liechtenstein

What is the LSIiBBU07 battery backup unit?

The LSIiBBU07 unit is a lithium ion (LiON), intelligent battery backup unit that protects the integrity of the cached data on a MegaRAID controller for up to 72 hours (depending on the derated retention time selected) in the event of a complete AC power failure or a brief power outage.

How do I install the LSIiBBU08 on A Megaraid SAS RAID controller?

To mount the LSIiBBU08 on the RAID controller directly, follow the steps in Installing the LSIiBBU08 Directly on the MegaRAID SAS RAID Controller. Connecting the LSIiBBU08 Remotely to the MegaRAID SAS RAID Controller. The following figure shows the front view and the rear view of the LSIiBBU08.

How do I connect LSIiBBU08 to SAS 9280-8e RAID controller?

Connect one end of the 12-inch, 20-pin cable (included in the remote battery kit) to the J2 connector on the LSIiBBU08, and the other end to the J6B1 BBU connector on the SAS 9280-8e RAID controller RAID controller, as shown in the following figure. The black triangles on the connectors help you install them properly.

How do I connect my LSIiBBU07 to a RAID controller?

Insert the 20-pin cable connector at one end of the 12-in. cable into the 20-pin J2 cable connector on the LSIiBBU07 unit on the remote mount board and the 20-pin cable connector at the other end into the 20-pin J1 connector on the board-to-board adapter card on the RAID controller.

What happens if a battery backup unit is installed backwards?

CAUTION Damage to the battery backup unit will occur when power is applied to the system if the cable assembly connectors are installed backwards in either the JT1 board-to-board connector or the J2 battery connector.

The LSIiBBU07 unit is a lithium ion (LiON), intelligent battery backup unit that protects the integrity of the cached data on a MegaRAID controller for up to 72 hours (depending on the derated ...
