

Does Honduras have solar power?

Honduras has a large potential for solar photovoltaic generation. In fact, it is a practical solution for servicing energy-isolated rural communities. In 2007, there were about 5,000 individual Solar Home Systems, with an average size between 30 Wp and 50 Wp, which makes up for a total capacity of approximately 15 to 25 kW of power.

Can Honduras generate electricity based on hydropower?

In Honduras, there is a large potential for electricity generation based on hydropower. In 2003 then President Ricardo Maduro put in place a Special Commission for the Development of Hydroelectric Projects. There are 16 new hydro projects that are expected to be commissioned before 2011, with an overall capacity of 206.5 MW.

How many geothermal projects are there in Honduras?

The three planned geothermal projects in Honduras add up to 85.5 MW of installed capacity. The largest of them is called Platanares, in the Department of Copan, which began operations in 2011 with an installed capacity of 40.5 MW and a generation of 354.8 GWh per year.

This article delves into the burgeoning solar panel industry in Honduras, highlighting its supply chain centers, top solar panel manufacturers, and the main fairs that are pivotal for companies looking to make their mark in the solar energy market in Honduras.

Services | Most systems installed today are what's known as grid-interactive or grid-tied systems. That means the solar energy system works in parallel with utility electricity to provide power to a home or business in a seamless manner. With a grid-interactive system, you are not aware of the source of electricity (unless looking at a system monitor). There are no switches to worry about ...
