

What is Rencore Energy?

Rencore Energy is a renewable energy developer established in 2016 with offices in the UK, France, and Mali. Rencore Energy's focus is on projects that support the energy transition in Africa, including wind and solar photovoltaic generation, storage & transmission.

What does Rencore do?

Rencore focuses on projects that support the energy transition in Africa, including wind and solar photovoltaic generation, storage & transmission. They originate projects and also work with local developers and sponsors to support and finance development in the African continent.

How will Senegal's power sector be strengthened?

Senegal's power sector would be strengthened by continued diversified investment in power, including renewables and natural gas, while phasing out heavy fuel oil. Senegal Energy Outlook - Analysis and findings. An article by the International Energy Agency.

Will Senegal's economy grow six-times bigger in the AC?

Senegal's economy could grow six-times larger in the AC while limiting growth in energy demand to three-times its current level by utilising new gas resources and boosting the use of renewables in power. In the AC, gas meets a growing share of energy demand while traditional use of biomass starts to decline in rural areas. IEA. Licence: CC BY 4.0

How will electrification affect Senegal's economy?

Senegal's stock of two/three-wheelers is set to grow strongly in both scenarios and its electrification would help to free oil for other productive uses. In the AC, cement production could more than double to 2040, although the availability of fuels, including domestic gas, will be critical for this and for wider future industrial development.

Should Senegal develop a natural gas strategy?

The development of natural gas strategies that cover the entire value chain, including end-uses (gas-to-power or gas-to-industry), would help Senegal to maximise the benefits of its natural gas.

Le projet vise à doubler la durée de vie des huiles usagées grâce à des technologies de régénération avancées, symbolisées par la machine ORV6-T500-DUO ...
