Mainstream provides solutions to corporates through Power Purchase Agreements (PPAs) offering sustainable, reliable and cost-effective power at predictable and competitive energy pricing. Additionally, the company provides Operations & Maintenance services, with 250 MW under management in South Africa across two wind farms.

OverviewEnergy providersPolicies & regulationsTypes of energyFuture researchSee alsoThe South African energy sector is dominated by the company Eskom. Eskom currently produces 95% of South Africa's electricity. Due to their large presence in the non-renewable energy sector, there are independent power producers (IPP) who are capable of providing renewable energy sources. To reach the 10,000 GWh renewable energy target, the government has joined agencies and implemented policies that promote independent renewable energy producers. BioTherm Energy
