

Can storage technologies improve energy security in Romania?

Such enhanced legislation is needed for implementing the Romanian National Energy and Climate Plan (NECP), which lists 'developing storage capacities' as an instrument to improve energy security but lacks detail on how storage technologies will be deployed until 2030.

What is Romania's energy storage policy?

Energy Policy Group (2020), Romania's Energy Storage: Assessment of Potential and Regulatory Framework, December 2020. The European Green Deal, with its flagship policy, the Climate Law, is set to enshrine into law the target of net-zero greenhouse gas (GHG) emissions by 2050.

Does Romania have a storage policy?

In response to EU Regulation 2019/943, which clarifies the role of storage and its ownership status, the Romanian authorities transposed in Law 155/2020 (amending Energy Law 123/2012) specific provisions related to new storage facilities and their management rules.

What are some examples of energy security issues in Romania?

One example is Romania's NECP, which at first did not address storage technology. The updated version of 2020 was marginally improved in this respect, listing 'developing storage capacities' as an instrument to improve energy security, but lacking detail on the storage capacity to be developed until 2030.

What is energy storage Europe?

As part of the World of Energy Storage, Energy Storage Europe is the industry's connecting point that effortlessly brings together both regional and international developments,&quot; adds Urban Windelen, Federal Managing Director of the German Energy Storage Association (BVES). B2B orientation is strengthened through trade fair cooperations

How much money will Romania get for battery storage projects?
