

What is the Golomoti solar project?

The Golomoti project is Malawi's second solar IPP after JCM's Salima solar project and proudly boasts the first utility-scale grid-connected battery energy storage system in sub-Saharan Africa, having connected to the grid in December 2021.

Where is Malawi's first solar power plant located?

The centrally located facility is Malawi's first solar power plant connected to the national grid, a project successfully completed under a public-private partnership (PPP). The President of the Republic of Malawi Lazarus McCarthy Chakwera visited the Salima district, 101 km from the capital Lilongwe, on November 16, 2021.

Is Malawi a good place to invest in solar energy?

"Salima Solar is the first solar PV plant in Malawi to be connected to the national grid. As such, it is a model for future projects in several ways... In particular, it demonstrates that Malawi is an attractive destination for private sector investment in energy," says President Lazarus McCarthy Chakwera at the plant's inauguration ceremony.

Who guarantees a solar plant in Africa?

The solar plant is guaranteed by the Africa Trade Insurance Agency (ATI), a financial institution established by seven Common Market for Eastern and Southern Africa (COMESA) countries with technical and financial support from the World Bank to provide insurance against political and commercial risks. Jean Marie Takouleu

The 20 megawatt (MW) Golomoti Solar Project in Malawi is the first of its scale in Southern Africa to include a battery energy storage system, which will enable the plant to provide reliable,...
