

Are battery energy storage systems proving their value?

Battery energy storage systems (BESS) from several different firms have been proving their value as they supported Britain through recent interconnector failures. BESS helped the energy system recover after the NSL interconnector, which connects the UK and Norway, suddenly stopped exporting power to the UK at around 8:47 AM yesterday (8 October)

Did SSE battery energy storage systems keep the lights on in the UK?

Following a major interconnector trip, BESS kept the lights on in the UK. Image: SSE Battery energy storage systems (BESS) from several different firms have been proving their value as they supported Britain through recent interconnector failures.

Where is TotalEnergies' battery energy storage system located?

Image: Saft. A second installation phase has been completed at TotalEnergies' battery energy storage facility in Dunkirk, northern France, bringing its output and capacity to 61MW /61MWh. The battery energy storage system (BESS) was already France's biggest system of its type -- at 25MW /25MWh -- when it was inaugurated in January 2021.

What role does battery storage play in Scotland's energy transition?

"The recent decision by Scottish Ministers validates the crucial role that battery storage will play in our energy transition. As Scotland continues to increase its renewable energy capacity, projects like Whitehill BESS are essential for providing the flexibility and resilience necessary to maintain secure and reliable energy supplies."

Where is Saft battery storage located?

Saft battery storage at the Dunkirk project. Image: Saft. A second installation phase has been completed at TotalEnergies' battery energy storage facility in Dunkirk, northern France, bringing its output and capacity to 61MW /61MWh.

How fast is battery storage deployment in France?

Battery storage deployment has not been as fast in France, or indeed much of mainland Europe, as it has been in markets like the US, UK and latterly Australia. RTE is conducting a pilot project, called Project RINGO, which will see just under 100MWh of battery storage deployed across three French sites that act as virtual transmission assets.

Large-scale long-duration energy storage (LDES) projects have been launched near Cyprus and in the UK, using technologies from BaroMar and RheEnergise that are an iteration of established LDES technologies. BaroMar ...
