

What are the energy accounts for Samoa?

1. Introduction This publication is the 2nd Energy Accounts ever produced, following the compilation of the first Experimental Energy Account for Samoa using the 2016 Samoa Energy Review by the Ministry of Finance. The Energy Accounts 2020 presents estimates on physical supply and use of energy (in joules¹) for Samoa.

What is Samoa's energy plan?

to energy development. The plan will address Samoa's energy issues, promote sustainable energy development, ensure long-term energy security, economic growth, and enhance energy efficiency to reduce the country's dependence on fossil fuels, minimize environmental impact, and create new opportunities for innovation, em

What are the energy supply and use components for Samoa in 2020?

Table 1 is a summary of the Energy Supply and Use components for Samoa in 2020. Samoa's energy supply totaled approximately 5,282 TJ where imported energy products accounted for an estimated 69.8 % (3,689 TJ) of total supply while natural inputs from the environment accounted for the remaining 30.2 % (1,593 TJ). Source: SBS, 2022.

What are the energy issues faced by Samoa's energy sector?

all energy stakeholders. The Plan will report on the energy issues faced by Samoa's energy sector, which includes high energy costs, dependence on imported fossil fuels, limited access to energy services in rural areas, and institutional capacity constraints to manag

What is the Samoa Energy Review 2016?

: Samoa Energy Review 2016 is produced by the Energy Policy Coordination and Management Division under the Ministry of Finance to provide the Government of Samoa, business community and the general public with a better understanding of energy data trends, miles

Why is energy development important in Samoa?

able energy development. By optimizing energy production and consumption, island countries like Samoa can not only improve their energy security but also reduce their carbon footprint and protect the planet's natural resource for future generations. Samoa faces unique energy challenges, including vulnerabilities that demand a strategic appro

Samoa: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.

Samoa: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across ...

This publication is the 3rd Energy Accounts for Samoa, and is one of the environmental economic accounts compiled by the bureau, using the United Nation System of Environmental--Economic Accounting (UN SEEA, 2012) and SEEA-Energy 2019. The Energy Account, Samoa 2022 presents estimates on physical supply and use of energy (in joules¹) for Samoa ...

In 2016, total energy produced in Samoa is estimated at 129.4 kilo tonnes of oil equivalent. Of the total energy produced, 27.3% was met by biomass, 69.2% by petroleum products while the remaining 3.2% was met by hydropower, solar, wind and other minor

Samoa NDC Commitment Low Carbon Energy Transition Roadmap | Samoa Case Study AFOLU Waste IPPU 3% Electricity 13% Transport 27% Others 10% Energy Sector (50%) Samoa's 2nd NDC (2021) aims to cut GHG emissions by 26% by 2030, out of which Energy sector targets 30% reduction from 2007 0 50 100 150 200 250 300 350 400 2007 Baseline 2030 Target in ...

The plan will address Samoa's energy issues, promote sustainable energy development, ensure long -term energy security, economic growth, and enhance energy efficiency to reduce the country's dependence on fossil fuels, minimize environmental impact, and create new

From 2020 to 2022, total energy produced and imported in Samoa was estimated at 121.9 kTOE ¹ for the year 2020, this amount decreases by 1.1% in the year 2021 to 120.6 kTOE, where in 2022, it further decreases again by 0.7% to 119.3 kTOE.

The purpose of this Energy Sector Plan is to provide a comprehensive plan for the energy sector to deliver outcomes consistent with the overarching Strategy for the Development of Samoa (SDS) 2012-2016, with due regard for cross-cutting issues including emphasizing the importance of raising living standards, increasing resilience and boosting ...

developing areas. Energy self-sufficiency has been defined as total primary energy production divided by total primary energy supply. Energy trade includes all commodities in Chapter 27 of the Harmonised System (HS). Capacity utilisation is calculated as annual generation divided by year-end capacity x 8,760h/year. Avoided
