

Savills energy Congo Republic

Who are Savills Energy?

Savills Energy is one of the country's principal consultants for renewable energy projects in the UK and has one of the most experienced teams in wind planning. There is no such thing as a typical wind energy project and each requires a blend of different skills.

Who are Savills wind energy developers?

Savills has worked with several UK developers on wind energy projects, including npower, RES Limited, Ecotricity, Enertrag, Airvolution, and Infinergy. Savills has a proven track record in wind energy development, gained through the establishment of Infinergy, a joint venture wind development company, in 2003.

Who is Savills in wind energy?

Savills is a company with a proven track record in wind energy development. They established Infinergy, a joint venture wind development company, in 2003. Savills is involved in wind energy through Infinergy. On and offshore wind is set to remain a significant contributor to the UK's energy mix and is supported by both the Feed in Tariff and the Renewables Obligation.

Does Savills energy have ground-mounted solar?

Savills Energy and its partners have developed 70MW of ground-mounted solar, with 40MW built by March 31st 2013. This approach requires careful balancing of suitable land and viable terms for acquisition, identified and delivered on a scale capable of producing institutionally attractive returns.
