Who is Senator power systems?

Senator Power Systems is an emerging provider of ruggedized power supply solutions, we specialize in design and development of reliable AC-DC Power Supplies, DC-DC Converters, High Voltage Battery Chargers.

Why should you choose Senator power systems?

Senator Power Systems has developed highly efficient and versatile power supplies that can be adapted with a high degree of integration, safety and reliability to your needs. We design and develop reliable, compact and highly efficient power supplies. Our rugged power supplies are designed to meet the MIL Standards.

What is China power system transformation?

China Power System Transformation has a two-fold objective. First, it provides a summary of the state of play of power system transformation (PST) in the People's Republic of China ("China") as well as a comprehensive discussion of PST internationally.

Why should you choose Senator's automotive power supplies?

Senator's Automotive power supplies are designed to meet the automotive standards. Our knowledge and experience enable us to produce innovative designs to meet your requirements. Our products are designed utilising Model Based Systems Engineering (MBSE).

How will China's power sector transformation impact the world?

Accelerated progress on power sector transformation could bring substantial benefits to China and the world. China's power system is the largest national power system in the world; it accounted for one quarter of global electricity consumption in 2017 and its share is expected to rise to around 30% by 2035 in the NPS.

Can China achieve a transformed power system by 2035?

Advanced energy modelling exercises highlight the possibility of achieving a transformed power system in China by 2035. Two different IEA scenarios describe possible configurations for the Chinese energy system in 2035. This report elaborates on the main scenarios for China from the IEA World Energy Outlook (WEO).

Senator Power Systems is an emerging provider of ruggedised power supply solutions, we specialise in design and development of reliable AC-DC Power Supplies, DC-DC Converters, High Voltage Battery Chargers and Motor Drives.

The rise of low-cost wind and solar power, deployment of distributed energy resources (DER) and increasing digitalisation are accelerating change in power systems around the world, including the People's Republic of China ("China").
