

What is a SAFT SBLE battery?

Soft SBLE,SBM and SBH ranges of block nickel batteries are the optimum solution where power is required for an uninterruptible power supply, switching and transmission, emergency and security systems, industrial fire monitors and alarms, process control installations, substation switchgears, signaling systems and more.

Who is Saft battery?

For more than 100 years, Saft has been specializing in advanced-technology battery solutions for industry, in space, at sea, in the air and on land in remote and harsh environments from the Arctic Circle to the Sahara Desert. Today, Saft is a wholly-owned subsidiary of TotalEnergies.

Are SAFT Batteries safe?

For over 100 years, Saft's longer-lasting batteries and systems have provided critical safety applications, back-up power and propulsion for our customers. As a leading battery company, Saft's innovative, safe, and reliable technology delivers high performance on land, at sea, in the air, and in space.

What are SAFT Batteries used for?

Whether it be for aerospace or transportation, telecom & networks or oil & gas, health or energy utilities, Saft batteries are used for numerous applications and on all continents. From the Arctic Circle to the Sahara Desert, or within NASA and European Space Agency vessels, we provide state-of-the-art batteries and battery systems.

Where is Saft NiFe battery made?

The Saft Nife block battery is manufactured in Sweden at one of our many internationally accredited ISO 9001 sites. An electrolyte solution of potassium hydroxide and a small amount of lithium hydroxide acts only as an ion transfer medium, delivering optimum performance without causing base material degradation.

What is a SAFT NiFe block battery?

The Saft Nife nickel-cadmium block battery's unique electrochemistry enables it to regularly withstand any depth of discharge. Following a deep discharge the block battery is designed to recharge very quickly and economically, using standard single or two-level charging equipment.

Soft SBLE, SBM and SBH ranges of block nickel batteries are the optimum solution where power is required for an uninterruptible power supply, switching and transmission, emergency and security systems, industrial fire monitors ...

Saft is the world leader in space and defence batteries with its Li-ion technologies, which are also deployed in energy storage, transportation and telecommunications. Saft's products and solutions are essentially nickel-based batteries, primary lithium and new-generation lithium-based batteries and battery systems.

Saft's range of robust nickel and lithium battery solutions are used by customers around the world to meet the complex demands of the oil and gas industry. Saft provides reliable backup power ...

Sunica.plus nickel battery. Ready and reliable, even in challenging conditions. Sunica.plus is the perfect solution for remote installations that rely on power generation such as solar panels, wind-turbines and diesel generators. These nickel batteries can be used under the most difficult environmental conditions.

It became the leading manufacturer of nickel-cadmium batteries [10] both in the aviation sector and in the railway sector. [9] In 1995, Alcatel delisted the company from the stock market and acquired a 100 percent of its shares. Later, Saft purchased Nife and Alcad, its main rivals, as well as the Czech company Ferak.
