

Sinopec Daylight: Formed following the acquisition of Daylight Energy, Sinopec Daylight is the operated portion of Sinopec Canada. Sinopec Daylight is a Montney focused business, with core assets in the Wapiti area south of Grande Prairie. Wapiti lands include 137,000 acres of Montney rights in the over-pressured, liquids rich window.

In 2008, Sinopec bought Tanganyika Oil for \$2 billion giving Sinopec access to its Syrian oil fields. [58] [59] These fields were reported to have over a billion barrels of crude reserves and a trillion cubic feet of natural gas reserve. However, the Syrian investments became significantly less valuable in 2012 when the Syrian civil war began. [60]

Asia's top refiner China Petroleum and Chemical Corp (Sinopec Corp) has completed building a 12 million-barrel commercial crude oil storage facility in Maoming city in southern Guangdong province ...

China Petroleum & Chemical Corporation, or Sinopec, expects oil demand in China to peak before 2027, according to the 2024 edition of the China Energy Outlook 2060 that the world's biggest ...

for refined oil products in China Gas stations over 30,000 Chemicals No.1 ethylene producer in China, No.3 globally Annual ethylene output over 13 million tonnes Trading World's leading crude oil trader Sinopec Sinopec has many advantages of engaging in all stages of the CCUS process.

SHANGHAI: China's Shanghai International Energy Exchange (INE) said in a statement on Thursday it increased the storage capacity at two of energy giant Sinopec's crude oil futures delivery warehouses. The delivery warehouses, one at the Yangpu Economic Development Zone storage in the southern province of Hainan and the other at Rizhao city in ...

AECO physical storage and trading hub for natural gas on the TransCanada Alberta Transmission System (NOVA) which is the ...

China's Shanghai International Energy Exchange (INE) said on Tuesday it will add 100,000 cubic metres of storage capacity at the crude oil futures delivery warehouse of a Sinopec Group unit.

In April 2021, the catalytic cracking technology of crude oil independently developed by Sinopec's Beijing Research Institute of Chemical Industry, another "crude-to-chemicals" solution, also completed industrial application in Yangzhou, which has made China a leader in catalytic cracking of crude oil globally. Similar to the crude oil steam ...

Daylight Energy. In 2011, Sinopec acquired Daylight Energy, a Canadian oil and gas company, for approximately \$2.2 billion. This acquisition gave Sinopec access to significant oil and gas assets in Western Canada, strengthening its position in the ...

The new venture, located in Gulei industrial park of Zhangzhou city, includes a 16 million metric ton-per-year (tpy), or 320,000 barrels per day, refinery, a 1.5 million tpy ethylene plant, a 2 million paraxylene facility as well as a 300,000 tonnage crude oil terminal, Sinopec said in a statement.

The state-owned oil giant, which owns around 30% of China's refining capacity, has started building the 20,000 mt/year carbon-free project in Kuqa, Xinjiang Uygur Autonomous Regions and is expected to commission the plant and start production in June 2023, according to a company statement on Nov. 30.

Recently, China Petrochemical Corp, or Sinopec Group, has discovered abundant flows of natural gas and crude oil at the Shunbei-42X well and the Shunbei-41X well in the petroliferous Tarim Basin in the Xinjiang Uygur autonomous region. With an average dept

Axisymmetric drop shape analysis (ADSA) has been applied to study the interfacial interactions of CO₂ and reservoir fluid systems at elevated pressures and high temperatures. Using ADSA for the pendant drop technique, it was possible to determine the interfacial tension (IFT) and visualize the interfacial interaction phenomenon of CO₂/crude oil, ...
