

Solar companies in netherlands Dominican Republic

Is photovoltaic technology right for the Dominican Republic?

Here, too, photovoltaic technology is the method of choice. As the largest solar park in the Caribbean with a total capacity of 116 MW (phase I - 58 MW, phase II - 58 MW), the Montecristi solar park has laid the foundation for a sustainable turnaround in energy policy in the Dominican Republic.

How many solar projects have you installed in the Dominican Republic?

In the Dominican Republic alone, we've installed over 300 solar projects, and our portfolio is expanding quickly throughout the region. During every stage of your solar project, you will only interact with highly qualified professionals who know how to get results.

Why is the Dominican Republic interested in solar energy?

The framework conditions for this are provided by the world's largest energy source, the sun. Global radiation is about double that of Germany. The Dominican Republic's energy supply is largely dependent on crude oil imports at present. The rising import price of this limited energy source is leading to increased interest in solar power.
