Who is Norfolk solar?

WHY US? Welcome to Norfolk Solar, the premier provider of solar PV, solar thermal and electric vehicle charging points in Norfolk. Solar PV is the greenest way to provide heating and lighting to your home.

How much does a solar PV inverter cost?

Their modular systems, for instance, not only offer a space-saving benefit, but they also ensure that one malfunctioning panel does not affect the productivity of an entire string of solar panels. The average solar PV inverter replacement cost of a micro inverter typically ranges from £20 per unit to £100 per unit.

Which solar inverters are available for on-grid applications?

Grid tied solar inverters for on-grid applications to convert DC power into usable AC power - including string, DC-optimized and hybrid inverters. We stock single and three-phase inverters for residential and commercial applications from Fronius, GivEnergy, SMA Solar, Solis and SolarEdge Technologies.

How much does a string inverter cost?

Most string inverters come with a 5- to 10-year warranty that can be extended for a premium. Considering most solar panels come with a 25-year warranty, it goes without saying that you will at some point have to replace your inverters. The average solar PV inverter replacement cost of a string inverter typically ranges from £500 to £1500.

What is a solar power inverter?

Without getting too technical, a solar power inverter is a large component within a solar panel system that converts the direct current (DC) produced by your solar panels into ready-to-use alternating current (AC) to power your home. Most inverters typically have a conversion efficiency between 93% and 96%.

What types of solar inverters are available?

We stock single and three-phase inverters for residential and commercial applications from Fronius, GivEnergy, SMA Solar, Solis and So Grid tied solar inverters for on-grid applications to convert DC power into usable AC power - including string, DC-optimized and hybrid inverters.
