

What is a solar log 2000?

Loading... The Solar-Log 2000 is the perfect solution for monitoring and controlling large-scale PV plants and solar power stations with a maximum plant size of 2000 kWp. The energy management system offers comprehensive reporting options.

What is solar-log 2000?

When used with the Solar-Log WEB Enerest(TM) XL and either the SCB, the Solar-Log 2000 monitors every single string, ensuring the most complete and secure monitoring for large-scale PV plants with exact error identification and localization.

How many solar-log 2000 plants can be connected together?

With its master/slave technology, a total of 10 Solar-Log 2000 can be connected together at one plant. This greatly expands the maximum possible plant size. The Solar-Log 2000 offers the option to measure the amount of self-produced power consumed and to present it graphically via the Solar-Log(TM) WEB "Commercial Edition".

How many inverters can a solar-log 2000 monitor?

The new high-performance top-of-the-line model can monitor a maximum plant size of 2000 kWp and up to 100 inverters. With its master/slave technology, a total of 10 Solar-Log 2000 can be connected together at one plant. This greatly expands the maximum possible plant size.

Who needs a solar-log manual?

This manual is intended for solar energy technicians and qualified electricians who are installing a Solar-Log 300, Solar-Log 1200 and Solar-Log 2000, wiring them to inverters, configuring them to operate in particular systems, and putting them into operation.

What is a closing relay on a solar-log 2000 pm+?

Page 112 Closing relay during power reduction (only Solar-Log 2000 PM+) Select this option in order to signal any power reduction via the relay output on the Solar-Log 2000 PM+. o The relay may be loaded with a maximum of 24 V DC and 5A. Remote controlled active power reduction function described in the previous chapter.

Solar-Log Base 2000 - Intelligente Funktionalität und hohe Flexibilität für mehr Effizienz bei der Steuerung, der Regelung und dem Monitoring bis 2 MWp Anlagengröße ohne Netzteil.

The Solar-Log 2000 is comfortable monitoring and controlling large-scale PV plants and solar power stations. The new high-performance top-of-the-line model can monitor a maximum plant size of 2000 kWp and up to 100 inverters. With ...
